

# Accuspray System HG09

## Ten Commandments

- DO** – Use two wrenches to tighten the air flow control valve (if you prefer to tighten beyond hand tight).
- DO NOT** – Put the gun in a gun washer.
- DO** – Pull the trigger back while removing and replacing the atomizing head
- DO NOT** – Use the gun without the air flow control valve
- DO** – Adjust the fluid and fan control knobs to achieve the desired pattern
- DO NOT** – Store the spray gun without an atomizing head attached to protect the fluid needle.
- DO** – Inspect the atomizing head for wear and damage after each use (including fluid leaks)
- DO NOT** – Use more than 20 psi with full trigger pull
- DO** – Wipe off additional residue from fluid needle after each use
- DO NOT** – Depress the release buttons when attaching atomizing head
